i'm trying to play this game. in the end, i came up with this: i don't know what i'm doing wrong here. in my file, all the textures have the appropriate extension and i'm getting this error: ERROR: texture #7: cannot find file "textures/rocks/rocks01.dds" my textures are in the folder textures in my main folder. i also have the picture directory in the file, but it's empty. any help would be appreciated. A: Use your main menu to run the script: mainmenu -script rock.srdf To run it in the game: rock.srdf To make use of the other options for Rock and use different file names, see the comments on the script itself. PS: Make sure you understand the file structure in a script, so you can make the script yourself from scratch. Efficacy of Gavita, a multivitamin/mineral/antioxidant (MVMA) preparation, in an animal model of liver injury induced by continuous alcohol intake. To examine the efficacy of a multivitamin/mineral/antioxidant preparation, Gavita, in protecting the liver against alcohol toxicity in an experimental model. C57Bl6 mice were randomly assigned to three groups. One group (n=8) was fed a Lieber-DeCarli liquid diet containing ethanol (30% w/v) for 5 weeks. The second group (n=8) was fed the same diet plus Gavita (5 g/kg diet) for the last 5 weeks of the experimental period. The third group (n=8) was fed a liquid diet for 5 weeks but did not receive any additional nutrients. At the end of the experiment, blood was collected for measurement of blood alcohol concentration (BAC) and liver samples were removed for analysis of lipid peroxidation, glutathione-S-transferase (GST) activity, and plasma transaminase (aspartate aminotransferase, AST; and alanine aminotransferase, ALT) levels. Both Gavita treatment and continuous alcohol intake resulted in increases in AST levels and decreases in serum albumin levels compared to those in the non-alcoholic control group. Gavita treatment led to a significant decrease 82157476af
